RF Spectrum Analyzer Dongle

Simple and easy to use RF Spectrum Analyser!

Features:

- **Portable, and easy to use.**
- **USB connection**
- **Two spectrum analyzer programs.**
- **Use R820T+RTL2832U chip**
- **Support windows**

Specification:

- **Frequency range 24 MHz to 1700 MHz**

Application:

- **Make relative measurements on antenna to find directivity**
- **Compare the gain of one antenna to another**
- **Make relative measurements on transmitted power**
- **Check if the transmitter is transmitting, like car key or other wireless remote**
- **See what signals are in the air**
- **Listen to radio communication**
- **EMI testing and much more**

Included:

- **RF spectrum analyzer dongle**
- **Antenna**
