

The KEYper MX Electronic Key System provides a revolutionary method of key and asset management designed to fit the needs of all industries while providing the ultimate solution in accountability, analytics, security, and asset control. KEYper MX key systems can be customized to fit the needs of your organization ranging from 32 to 288 keys per cabinet, and can easily be expanded to more than 2,000 total keys. KEYper MX key systems can be easily wall-mounted or configured as a free-standing system. The system provides a complete audit trail of your keys and assets. You will always know who has your keys, when they took them, and why. The KEYper MX key system also offers a wide array of features and add-ons to meet your organization's needs.

- **Web-Based Administration**
- **Customized Reporting**
- **Email SMS/Alerts**
- **Digital Photo Capture**
- **Multiple Access Options (PIN, Biometric, Proximity Cards)**
- **And Much More**

## Features And Add-Ons

### Fleet Management

Increase the efficiency and operation of your fleet! Track odometer statements and daily usage of your fleet vehicles. Assign vehicle reservations for quick and easy pickup.

### DMS Integration

KEYper® has partnered with Dealer Downloads, providing the ability to import your vehicles from most DMS Providers.

### Lot Blocking

Use our Lot Blocking system to help identify vehicles that may be blocked by multiple vehicles. Also identify the exact lot location of any given vehicle.

### Enhanced Security Lock and Hasp

Use the KEYper® Security Lock and Hasp to bring an added level of security to your cabinets.
