

# PENGUIN PILE-UP

Ravensburger® game no. 21312 2

Licensor: Seven Towns Limited

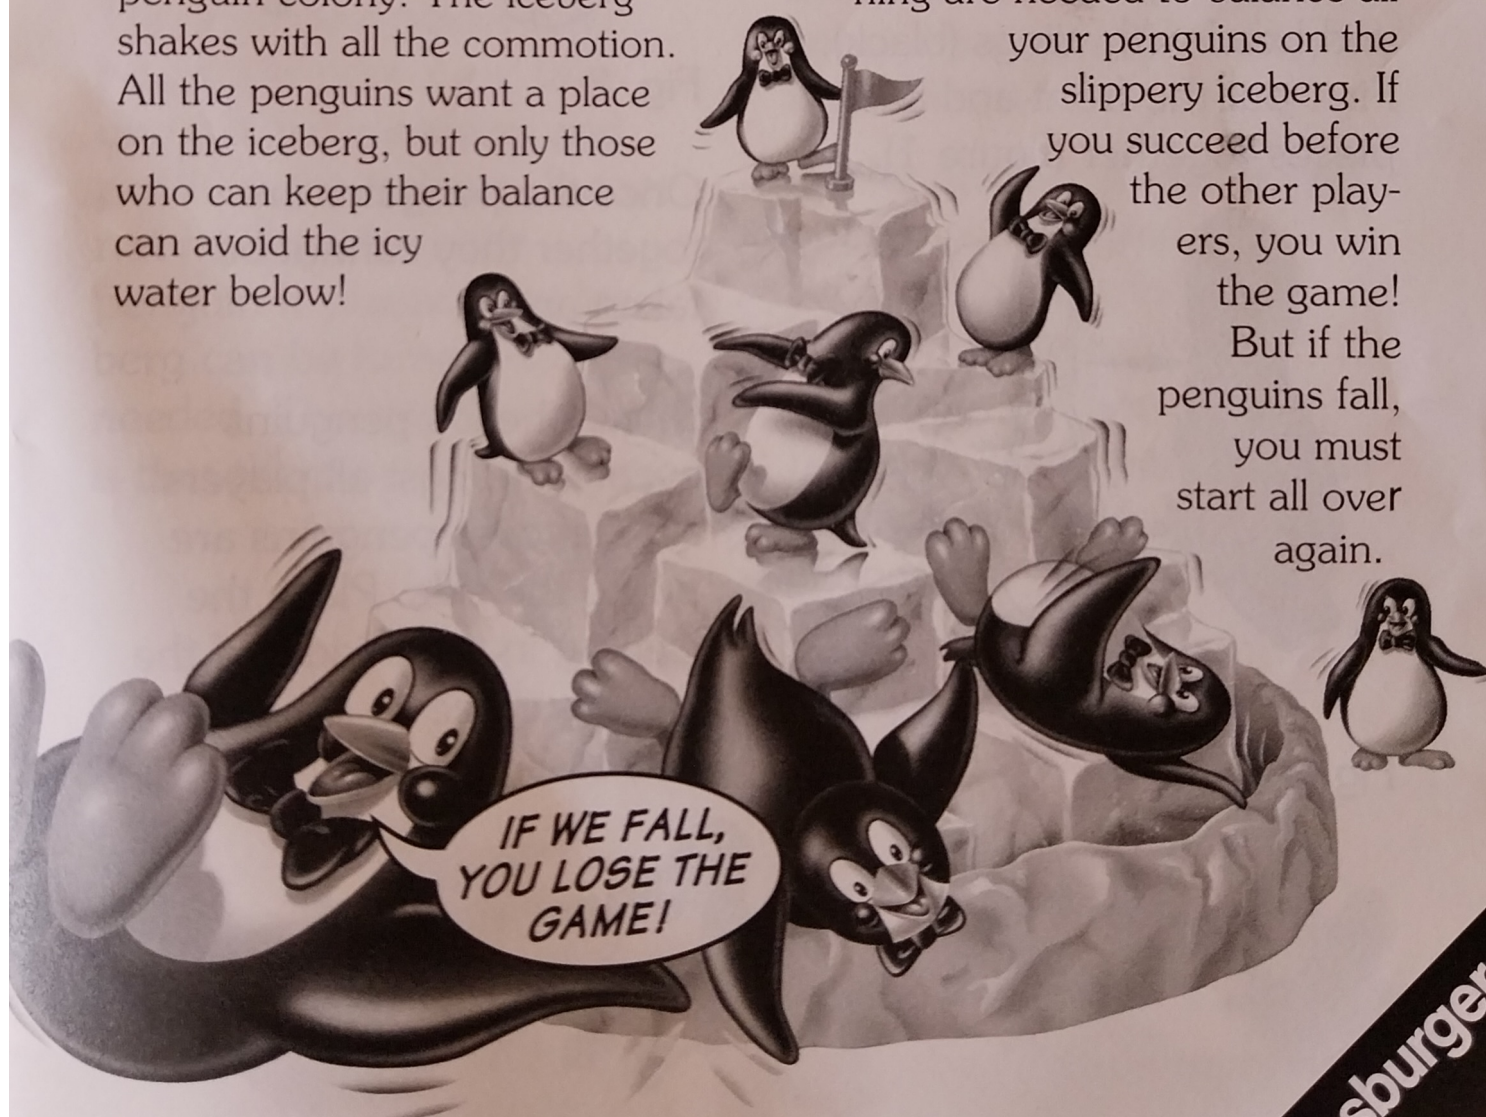

Illustration: IDL

A balancing game for 1 - 6 players, ages 5 & up.

There is much ado in the penguin colony. The iceberg shakes with all the commotion. All the penguins want a place on the iceberg, but only those who can keep their balance can avoid the icy water below!

Steady hands and careful planning are needed to balance all your penguins on the slippery iceberg. If you succeed before the other players, you win the game!

But if the penguins fall, you must start all over again.

## CONTENTS:

- 1 game base
- 1 iceberg with flag
- 24 penguins
- Game rules

## BEFORE YOU BEGIN

Place the iceberg on the game base. Put the flag on the top of the iceberg. Assemble the penguins: front (white), back (black) and head with wings (black). First put the front and back pieces together (figure 1).

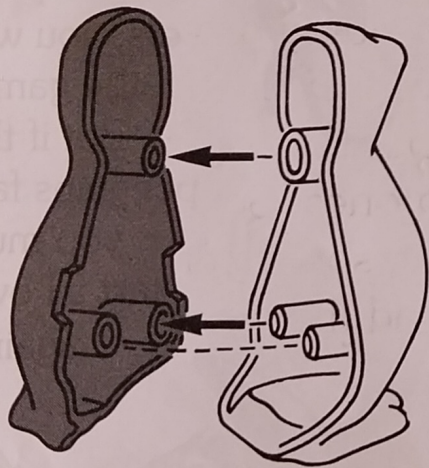

Fig. 1

Then, from the front, place the head and wing piece on the figure. The stick from the bowtie and the wing fit together (figure 2).

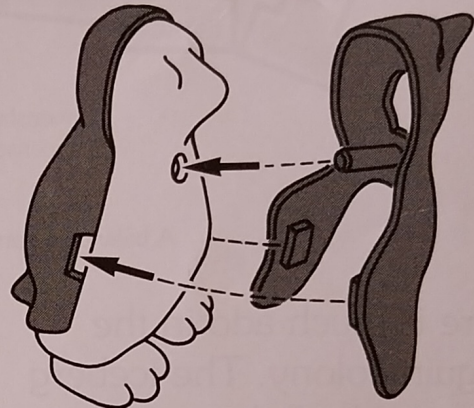

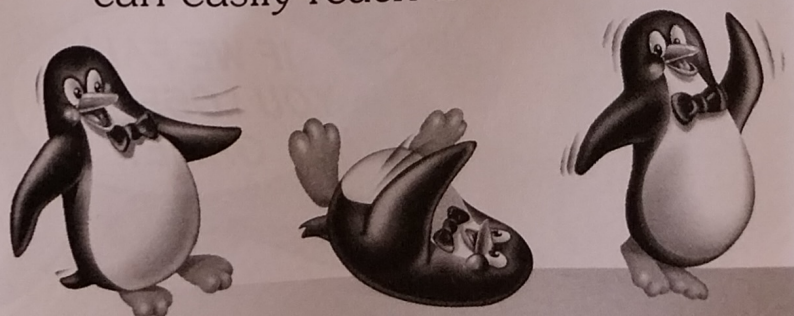

Fig. 2

Once the penguins are together they cannot be taken apart.

Divide the 24 penguins evenly amongst all players. Any leftover penguins are put to the side. Place the iceberg in the middle of the game surface so all players can easily reach it.

## OBJECT OF THE GAME

Get as many of your penguins on the iceberg as possible. The player who gets rid of all his or her penguins first wins the game.

## PLAYING THE GAME

The youngest player may begin. On your turn, take one of your penguins and put it on the iceberg. It does not matter where the penguin is placed. The iceberg can be turned, if needed. The important thing is that the penguin is secure

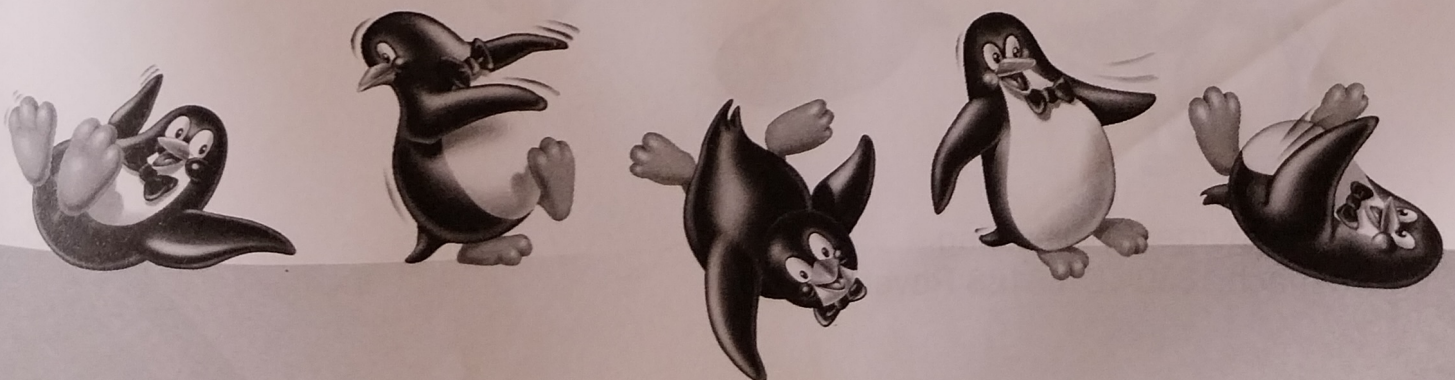

and won't fall. If the penguin falls, you must take it back.

Play continues to your left.

Each player puts only one penguin at a time onto the iceberg.

If more than one penguin falls - either while you are placing a penguin or immediately after - then you must take all the fallen penguins back. Your penguin colony is growing!

As the number of penguins on the iceberg grows, it becomes harder to find a good spot to place the existing ones. Sometimes, however, some penguins fall down and the whole game changes.

## END OF THE GAME:

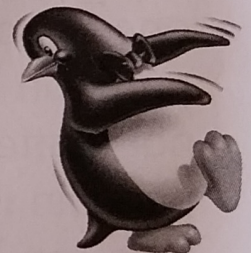

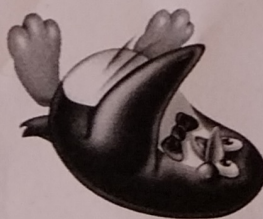

The first player to put all his or her penguins on the iceberg wins the game.

## RULE FOR ONE PLAYER

Try to put all of the penguins on the iceberg. It's a real challenge to place all 24 of them! How many can you place? Play a number of rounds and try to improve your total with each game.

 **WARNING:**  
**CHOKING HAZARD**  
Small parts. - Not for  
children under 3 years.
