The Club has the following Medical Plan in operation

First Aid Officers

The Club has trained an appropriate number of personnel to the standard of First Aid at Work, Emergency First Aid at Work, Sports First Aid, Paediatric First Aid, and Appointed Person with a minimum of 2 personnel in the venue on any game day. The register of all personnel who have a valid certification will be on display.

First Aid Officers Responsibilities

First Aid Officers must provide initial first aid attention when necessary to members of staff and the public whilst within the boundary of the venue. They will remain with an injured or ill person until no further treatment or assistance is required, or until the person is handed over to ambulance or other medical personnel, unless the first aider's personal safety is at risk. They will recognise their limitations and only administer or carry out duties that have been included in their training. They will ensure the Club's accident book is updated for the treatment of any person in relation to any injury/incident. They are aware of the location of the first aid kits, defibrillator and medical room.

First Aid Kit

The Club has available at each home game a mobile first aid kit, a static wall mountable first aid kit, and a dedicated medical treatment room. This cabinet meets the requirements of the Health and Safety (First Aid) (1981) act, and will be suitable for up to 50 persons. The Appointed Person will ensure that all first aid kits under their control are fully stocked and will carry out regular audits on the contents, and arrange to replenish supplies when required. Also available at the venue will be a defibrillator which will be present at all times and training has been provided to several key personnel in the safe operation.

Supporters

Spectators and staff may suffer from a medical emergency when in attendance at the stadium. Certified First Aid personnel will be in attendance at every home game as required. There is a dedicated first aid room located within the clubhouse and is equipped with a suitable first aid kit. Spectators and staff may suffer from an injury as a result of a slip, trip or fall in the stadium. Certified First Aid personnel will be in attendance at every home game where required.

Players

Keeping player's fitness is viewed by the club as critical, and qualified people are appointed by the club to ensure that the players' fitness is at a level that will allow them to play to their capabilities and be less prone to injury. The players will train a minimum of twice per week with physios and first aiders in attendance.

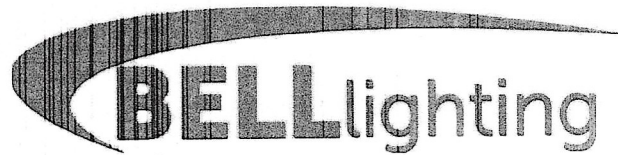

Any player who complains of illness or displays apparent symptoms of illness will be referred to their own GP and followed up where required.

If a player is injured at training or during a game, they will be examined by the physio or a first aider. If the injury is not within the first aiders capability to deal with, the player will be referred to either their own GP, for a medical scan through Nuffield Health, or to the hospital in extreme cases.
